

# PointModeller

## Keyboard Shortcuts

### General

| Action      | Shortcut |
|-------------|----------|
| Import data | Alt+F2   |
| Export data | Alt+F3   |
| Cut         | Ctrl+X   |
| Copy        | Ctrl+C   |
| Paste       | Ctrl+V   |
| Undo        | Ctrl+Z   |
| Redo        | Ctrl+Y   |
| Rerun       | Alt+R    |

### Project explorer

| Action                                   | Shortcut   |
|--|------------|
| ► Expand / ▼ collapse selected container | +/-        |
| View selection in active view            | Ctrl+Alt+N |
| Rename selected object                   | F2         |

### Selection toolbar

|                        | Action                         | Shortcut |
|------------------------|--------------------------------|----------|
| Selection types        | Hands-free manipulation        |          |
|                        | Select objects                 | 1        |
|                        | Select points                  | 2        |
|                        | Select edges                   | 3        |
|                        | Select facets                  | 4        |
|                        | Select cells                   | 5        |
|                        | Select blocks                  | 7        |
|                        |                                |          |
| Selection region modes | Cycle selection mode           | Shift+`  |
|                        | Rectangle                      | Shift+1  |
|                        | Polygonal                      | Shift+2  |
|                        | Freehand                       | Shift+3  |
|                        | Suspend selection highlighting | Pause    |

### Selection operations

|                           | Action                    | Shortcut          |
|---------------------------|---------------------------|-------------------|
| Object selection<br>()    | Select all in active view | Ctrl+A            |
|                           | Invert selection          | I                 |
|                           | Delete selection          | Delete, Ctrl+D    |
| Primitive selection<br>() | Select all                | Ctrl+A            |
|                           | Smart select              | Ctrl+S            |
|                           | Flood select              | Ctrl+Alt+S        |
|                           | Invert selection          | I                 |
|                           | Delete selection          | Delete, Ctrl+D    |
|                           | Crop                      | Alt+D, Alt+Delete |
|                           | Clear selection           | Ctrl+Space        |

### View window

| Action                       | Shortcut     |
|------------------------------|--------------|
| View selection (new view)    | Ctrl+N       |
| View selection (active view) | Ctrl+Alt+N   |
| New empty view               | Ctrl+Shift+N |
| Tile and tie view            | Ctrl+B       |
| Toggle full screen           | F11          |

### Camera

| Action                                | Shortcut      |
|---------------------------------------|---------------|
| View from top (x2 zoom extents)       | End           |
| Zoom to selection                     | L             |
| Set viewpoint                         | Shift+K       |
| Set centre of rotation                | C             |
| Toggle axis visibility                | A             |
| Toggle spin animation                 | Alt+.         |
| Set spin animation rotation and speed | Alt+left drag |
| Toggle projection mode                | 8             |
| Previous camera position              | B             |
| Next camera position                  | F             |

### Object visibility

| Action                      | Shortcut |
|-----------------------------|----------|
| Show/hide visibility editor | V        |
| Hide selected objects       | H        |
| Hide picked objects         | H+click  |
| Hide all unselected objects | Shift+H  |
| Show last hidden objects    | J        |
| Show all hidden objects     | Shift+J  |

### View manipulation

|                    | Action        | Shortcut       |
|--------------------|---------------|----------------|
| Manipulation modes | Z-Up          | Z              |
|                    | Look from     | K              |
|                    | Plan View     | P              |
|                    | Screen        | S              |
| Rotate ()          | Coarse rotate | ↑↓↔↔           |
|                    | Fine rotate   | Shift+↑↓↔↔     |
| Pan ()             | Coarse pan    | Alt+↑↓↔↔       |
|                    | Fine pan      | Alt+Shift+↑↓↔↔ |
| Pan ()             | Coarse pan    | ↑↓↔↔           |
|                    | Fine pan      | Shift+↑↓↔↔     |

### Effects

| Action                             | Shortcut         |
|------------------------------------|------------------|
| Decrease/increase point size       | -/+              |
| Decrease/increase line width       | 9/0              |
| Cycle render mode                  | G                |
| Cycle bounding box visibility      | Ctrl+Alt+Shift+J |
| Toggle headlight                   | Alt+3            |
| Toggle left light                  | Alt+4            |
| Toggle right light                 | Alt+5            |
| Toggle Eye-dome lighting           | Alt+6            |
| Increase/decrease light brightness | U/Y              |

## Pick modes

| Action                               | Shortcut    |
|--------------------------------------|-------------|
| Toggle 2D/3D pick mode               | X           |
| Project picked point to action plane | Shift+click |
| Disable snap targets                 | Ctrl+click  |

## Action plane and sections

| Action                                | Shortcut |
|---------------------------------------|----------|
| Move action plane to point            | A+click  |
| Previous action plane                 | Shift+B  |
| Next action plane                     | Shift+F  |
| Show/hide action plane                | Shift+A  |
| Show/hide action plane manipulator    | Shift+C  |
| View action plane from the front      | Home     |
| Step action plane up                  | [        |
| Step action plane down                | ]        |
| Quick section from two points in plan | Ctrl+/   |
| Show/hide the section manager         | Shift+/  |
| Toggle strip mode                     | /        |
| Step section forward                  | [        |
| Step section backward                 | ]        |

## Query and Filter

|            | Action                  | Shortcut               |
|------------|-------------------------|------------------------|
| Attributes | Object properties       | Ctrl+I                 |
| Geometry   | Query a point           | Ctrl+P,<br>Q+click     |
|            | Distance between points | Ctrl+Alt+D,<br>D+click |
| Volumes    | Surface                 | Alt+V                  |
|            | Closed solid            | Alt+B                  |
|            | Differential solid      | Alt+J                  |
| Filter     | Show all hidden points  | Shift+S                |
|            | Topography              | Ctrl+T                 |
|            | Minimum separation      | Ctrl+M                 |

## Colour and appearance

| Action                               | Shortcut   |
|--------------------------------------|------------|
| Greyscale by intensity               | Ctrl+1     |
| Random by intensity                  | Ctrl+2     |
| Greyscale by intensity, hue by range | Ctrl+3     |
| Hue by range                         | Ctrl+4     |
| Yellow to red (hot) by intensity     | Ctrl+5     |
| Yellow to blue by intensity          | Ctrl+6     |
| Magenta (monaro) by intensity        | Ctrl+7     |
| Spectrum by elevation                | Ctrl+8     |
| Spectrum by intensity                | Ctrl+9     |
| Random colour by container           | Ctrl+Alt+2 |
| Random colour by tag value           | Ctrl+Alt+3 |
| Random colour by grade               | Ctrl+Alt+4 |
| Uniform colour                       | Ctrl+U     |
| Opacity                              | Ctrl+G     |
| Surface appearance                   | Ctrl+H     |

## CAD

| Action                   | Shortcut     |
|--------------------------|--------------|
| Create points            | Alt+P        |
| Create smart line        | F8           |
| Create line              | F9           |
| Create polygon           | F10          |
| Create rectangle         | Alt+[        |
| Create circle            | Alt+0        |
| Fit a plane              | Ctrl+K       |
| Fit a line segment       | Ctrl+J       |
| Fit a circle             | Ctrl+L       |
| Fit loops                | F12          |
| 2D text annotation       | Alt+T        |
| 2D text label properties | Ctrl+Shift+T |
| Complete sequence        | Enter        |
| Cancel sequence          | Esc          |

## Edit

| Action                         | Shortcut |
|--------------------------------|----------|
| Translate objects              | Ctrl+R   |
| Rotate objects                 | Ctrl+E   |
| Toggle translation manipulator | Shift+T  |
| Toggle rotation manipulator    | Shift+R  |
| Split objects in two           | Alt+Q    |
| Merge objects into one         | Alt+W    |

## Modelling

|            | Action             | Shortcut     |
|------------|--------------------|--------------|
| Surface    | Topographic        | Alt+2        |
|            | Extrusion          | Alt+X        |
| Topography | Contours           | Alt+K        |
|            | Parallel sections  | Alt+P        |
|            | Arbitrary sections | Alt+A        |
| Repair     | Close breaks       | Alt+S        |
|            | Despike            | Ctrl+Shift+D |
|            | Fill holes         | Ctrl+Shift+F |
|            | Explode            | Ctrl+Shift+E |
